

TAKMIL

WhatsApp Feedback Testing Guide

Step-by-Step Procedure for Field Testing Team

Audience	Teachers, School Coordinators, Regional Coordinators
Requires	WhatsApp on phone · Registered phone number · Twilio sandbox joined
Dashboard URL	takmil-bot-production-0f51.up.railway.app/feedback-table
Date	May 2026

PART A — ADMIN SETUP

Done once by Tech Team before testing

1 Register each tester's phone number to a school

Each tester needs their phone number linked to a school in the database. Run this SQL in Railway PostgreSQL for each tester:

```
UPDATE schools
SET teacher_phone = '+923XXXXXXXXX'
WHERE identifier = 'SchoolIdentifier';
```

To find school identifiers:

```
SELECT name, identifier, region
FROM schools
WHERE identifier IS NOT NULL
ORDER BY region, name LIMIT 30;
```

✦ **Note:** Each phone number should be in international format — e.g. +923001234567 (Pakistan). One phone per school for testing.

2 Share the Twilio WhatsApp bot number with all testers

Find the bot number in: **Twilio Console** → **Messaging** → **Try it Out** → **WhatsApp Sandbox**

Share two things with each tester:

- The Twilio WhatsApp number (e.g. +1 415 523 8886)
- The sandbox join keyword (e.g. join example-word)

3 **Share dashboard access**

Share this URL with coordinators to monitor results in real time:

```
https://takmil-bot-production-0f51.up.railway.app/feedback-table
```

PART B — TESTER SETUP

Done once by each tester

1 **Join the WhatsApp Sandbox**

Each tester does this ONCE before they can send feedback:

1. Save the Twilio WhatsApp number in your phone contacts
2. Open WhatsApp and go to that contact
3. Send exactly this message (replace with your keyword):

```
join <sandbox-keyword>
```

4. Wait for the reply: **"You are connected to the Twilio sandbox"**

✓ Once connected, you can send feedback messages to this number

⚠ **Important:** The sandbox connection expires after 72 hours of inactivity. If the bot stops responding, send the join message again.

2 **Confirm phone is registered**

Send this test message to the bot:

```
Hi
```

The bot should reply with your school name. If it says **"school not found"** — ask the admin to register your phone (Part A, Step 1).

PART C — SEND DAILY FEEDBACK

Daily — send via WhatsApp

1

Send the feedback message in this exact format

Open WhatsApp, go to the TAKMIL bot number and send this message. Copy the format exactly — one field per line:

Feedback Date: 13/05/2026

Grade: Elementary-8

Level: 7

Total Strength: 25

Boys: 0

Girls: 25

Present: 24

Absent: 1

Leave: 0

LMS Attendance upload: Yes

Technology Used: Yes

If No Reason: USB not available

Classroom Media: Yes

Technology Media: No

Assembly Conducted: Yes

Subject: English

Unit Name: My Homeland

Unit: 2

Lesson: 2.10

Topic: Write an essay on justice

Page No: 14

Activity: Yes

Subject: Math

Unit Name: Real Numbers

Unit: 1

Lesson: 1.6

Topic: Properties of real numbers

Page No: 11

Activity: Yes

Subject: Urdu

Unit: 2

Lesson: 2.1

Topic: نعت کی پڑھائی

✓ **Good Practice**

- Use DD/MM/YYYY date format
- One field per line
- Subject separator: _____
- Urdu text works normally
- Leave fields blank if not applicable

✗ **Avoid**

- MM/DD/YYYY — causes wrong date
- Multiple fields on one line
- Extra blank lines inside subject blocks
- Changing field names

2 **Wait for the bot reply**

The bot replies within 5-10 seconds confirming the data was received:

✓ Attendance recorded for HajiPirBakshRajhir_A_W24S
Date: 13/05/2026 Present: 24 Absent: 1
Thank you!

⚠ **If you get "Sorry, something went wrong":** The format may be incorrect or the phone is not registered. Check Part B Step 2 and try again.

PART D — SEND CLASS PHOTO

AI head count + projector detection

1 **Send the feedback message FIRST (Part C)**

⚠ **Important:** The photo must be sent AFTER the feedback message. The AI compares the photo head count against the Present number you reported.

2 **Take a classroom photo and send it**

From the same WhatsApp chat with the TAKMIL bot:

1. Take a photo of the classroom showing students
2. Make sure heads/faces are clearly visible
3. If a projector is on — make sure it is in the frame
4. Send the photo — no caption needed

3 **Check the bot reply**

You will get one of these replies:

📷 Photo verified – ✅ MATCH

Photo head count: 24

Reported present: 24

Exact match! 🎉

📷 Photo verified – ⚠️ MISMATCH DETECTED

Photo head count: 10

Reported present: 24

Difference: -14 (58%)

Your coordinator has been notified.

The AI also detects if a projector is visible. This is shown in the dashboard under **"Projector (AI)"** column.

PART E — VERIFY IN DASHBOARD

1

Open the Feedback Data Table

<https://takmil-bot-production-0f51.up.railway.app/feedback-table>

2

Check your submission appears

Within 60 seconds (auto-refresh) your row should appear showing:

COLUMN	EXPECTED VALUE	CHECK
Date	Today's date (correct DD/MM)	[]
School	Your school name	[]
RC / Coordinator	Correct names	[]
Grade / Level	As submitted	[]
Present / Absent	Correct numbers	[]
Att %	Calculated correctly	[]
Assembly	✅ Yes or ❌ No	[]
Tech Used	✅ Yes or ❌ No + reason	[]
CR Media	✅ Yes or ❌ No	[]

LMS Upload	✅ Yes or ❌ No	[]
English — Lesson/Topic	As submitted	[]
Math — Lesson/Topic	As submitted	[]
Reported (Photo)	Present count	[]
AI Count (Photo)	AI head count	[]
Result (Photo)	✅ Match or ⚠️ Mismatch	[]
Projector (AI)	✅ Yes if projector seen	[]
Photo — View link	Opens classroom photo	[]

3

Test mismatch alert (optional)

1. Submit feedback with Present: 25
2. Send a photo that clearly shows fewer than 10 people
3. Bot should reply with ⚠️ MISMATCH DETECTED
4. Coordinator should receive a WhatsApp notification automatically

⚡ QUICK REFERENCE

✅ Tester Checklist

- Phone registered in DB
- Sandbox joined (send join keyword)
- Feedback message sent
- Bot replied with confirmation
- Classroom photo sent
- AI count reply received
- Row appears in dashboard
- All columns showing correct data

❌ Common Errors

- "School not found" — phone not registered
- "Something went wrong" — format error or DB issue
- Bot not responding — sandbox expired, resend join
- Wrong date in dashboard — use DD/MM/YYYY
- One submission per school per day allowed
- Photo before feedback — must send feedback first
